

Diplomat Prestige

Developed in response to market demand; for a fencing system for prestige locations where a change from conventional designs is required. The Diplomat range has the added advantage of no reduction in security, as the fundamental design of the panel retains security to a high standard.

The enhanced design offers security, with aesthetic style and a high resistance to climbing but retains the project image at its boundary.

Diplomat meets all of these demands in its standard format, and can be further enhanced by the provision of cranked posts with Anti-climb panels at a high level. This provides the end user with a secure physical barrier which makes attempts to scale the fencing system almost impossible.

Available in a standard range of heights from 0.90m to 2.50m.

The panels are constructed utilising a vertical bar with a round horizontal bar fusion welded to it at each intersection to produce a strong visually attractive assembly.

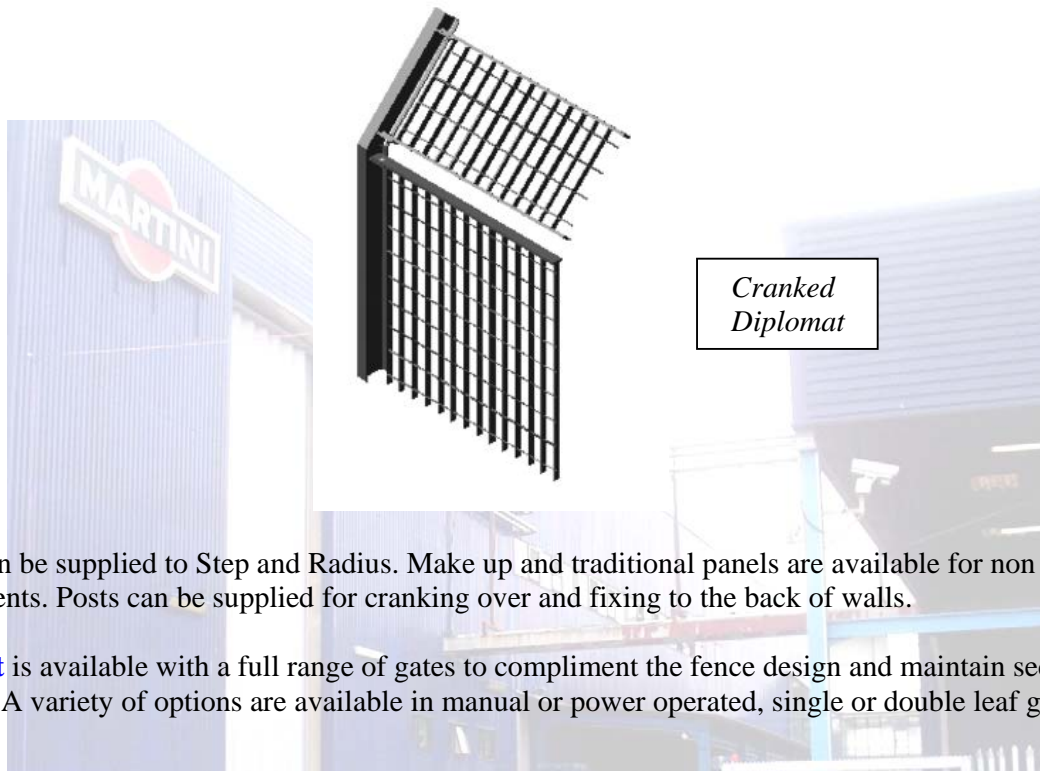

A choice of two mesh sizes are available, 100/60 and 60/50 mesh

Diplomat Prestige

Diplomat panels can be supplied to suit difficult site conditions. Technical advice and information is readily available from our sales and design teams. Please ask for further information.

Where the client is unable to provide sufficient detail our experienced personnel are available to visit your site and carry out a custom design survey.

Panels can be supplied to Step and Radius. Make up and traditional panels are available for non standard requirements. Posts can be supplied for cranking over and fixing to the back of walls.

Diplomat is available with a full range of gates to compliment the fence design and maintain security integrity. A variety of options are available in manual or power operated, single or double leaf gates.

Type	Mesh Size	Post Centres	Post Section	Height
PD1-60	60 X 50	2.13m	102 x 44 RSJ	0.93m
PD1-60	60 X 50	2.13m	102 x 44 RSJ	1.40m
PD1-60	60 X 50	2.13m	102 x 44 RSJ	1.90m
PD1-60	60 X 50	2.13m	102 x 44 RSJ	2.51m
